

International Dermato-Epidemiology Association Congress

**The Sir Clive Grainger Building,
University of Nottingham
7th-9th September 2008**

Programme

Theme: Burden of Skin Disease

Sunday 7th September 2008

SESSION 1: Concepts
Chair: Hywel Williams

- 13.30 **Fanfare and opening remarks**
Hywel Williams
- 13.40 **Conceptualisation of burden of skin disease**
Suephy Chen
- 13.50 **WHO Global burden of Skin Disease project**
*Professor Rod Hay, President, International League
of Dermatology Societies and lead of the
WHO Dermatology Global Burden of Disease programme*
- 14.10 **Format of consensus sessions**
Luigi Naldi

* * * * *

SESSION 2: Starting the consensus
Chair: Meg Chren

14:20 **Concepts and measurement of quality of life**
*Alan Tennant, Professor of Rehabilitation Medicine
at the University of Leeds*

Submitted abstracts on quality of life burden of disease

(Note: All abstracts will be 9 minutes plus 3 minutes questions - 12 minutes total)

14.50 O1 The quality of life impact of melanoma
S Coleman King

15.02 O2 Impact of melanoma on patients' lives: cross-sectional population-
based study in the South Netherlands
C Holterhues

15.14 O3 The burden of chronic pruritus is comparable to that of chronic pain
using time trade-off utilities
L K DeLong

15.26 Coffee/tea break

15.56 O4 Quality of life and health-state utilities in psoriasis patients at the
National Skin Centre, Singapore
P J Yit

16.08 O5 Family impact of cutaneous disease in the ectodermal dysplasias
Z P Rice

16.20 **Consensus I:
Quality of Life burden of skin disease – methods and
reporting standards consensus**
Discussion led by Suephy Chen

17.20 **The Legend of Robin Hood**
Mr Tony Rotheram, local historian and actor

17.50 Close

Informal dinner at College Hall

Monday 8th September

SESSION 3: Moving to Epidemiology ***Chair: Marty Weinstock***

- 09.00 O6 Measuring the prevalence of itch in the general population: results of a German pilot study
E Weisshaar
- 09.12 O7 Solar elastosis is associated with improved survival in melanoma patients who develop regional lymph node metastases
M E Ming
- 09.24 O8 Basal cell carcinoma more common among high socio-economic status: is there an association with localization, age and gender?
S van Hattem

10.36 Coffee/tea break

SESSION 4: Towards a consensus ***Chair: Jean-Jacques Grob***

- 11.06 O9 Patients with an increased number of kidney grafts have a decreased risk to develop squamous cell carcinoma after transplantation
H C Wisgerhof
- 11.18 O10 Do environmental factors influence eczema activity? – a panel study
S M Langan
- 11.30 O11 Depression and incident lower extremity amputation in veterans with diabetes
L H Williams
- 11.42 O12 Is herpes zoster associated with TNF-antagonists therapy in rheumatoid arthritis? Comparison of BIOBADASER and EMECAR cohorts
I Garcia-Doval
- 11.54 O13 Association of skin atopy and hand dermatitis: evidence from case-control studies nested in the PACO cohort
C Apfelbacher

12.06 Lunch and poster viewing

- 13.18 O14 Pharmacoepidemiology using clinical trials in health systems : ace inhibitors and reduced skin cancer risk in the VATTC trial
M A Weinstock
- 13.30 O15 The effect of NSAIDS on the incidence of cutaneous melanoma
A Joosse
- 13.42 O16 Reduced incidence of melanoma in a VA population using statins: a case-control study
R P Dellavalle
- 13.54 **Consensus II:
Epidemiological burden in dermatology**
Discussion led by Luigi Naldi
- 14.54** *Coffee and poster tours/discussions*

SESSION 5: Economic burden
Chair: Pieter Jan Coenraads

- 15.18 **Concepts of Economic Burden**
*Dave Whynes, Professor of Health Economics,
University of Nottingham*
- 15.48 O17 Cost of illness of work-related hand eczema in Germany
TL Diepgen
- 16.00 O18 The burden of skin disease in the United Kingdom
J K Schofield
- 16.12 **Consensus III:
Economic burden in dermatology**
Discussion led by Suephy Chen
- 17.12 **The BEES guest lecture: Snap-Shot MRI and Beyond**
Nobel Prize Winner - Sir Peter Mansfield

***Medieval dinner in the
Senate Chambers, Trent Building, University of Nottingham***

Tuesday 9th September

SESSION 6: *Embracing Dermato-Epidemiology in its entirety*

Chair: Peter Elsner

08.15 **BEES AGM and Executive Meeting**

09.00 **The Paolo Carli Lecture**
Professor Rob Stern, Boston

General Dermato-Epidemiology Abstracts I

09.40 O19 Perceptions and perspectives of psoriasis extent
C S Murray

09.52 O20 Psoriasis appears not to be directly related with using
cardiovascular and antidiabetic drugs
M Wakkee

10.04 O21 Warts: cryotherapy, salicylic acid or expectantly awaiting? – a
randomised controlled trial
S C Bruggink

10.16 O22 Does method of selecting starting dose affect efficacy of narrow-
band ultraviolet B phototherapy for psoriasis?
R S Dawe

10.30 *Coffee/tea break*

General Dermato-Epidemiology Abstracts II

11.10 O23 Interventions to reduce staphylococcus aureus in the management
of atopic eczema
A Birnie

11.22 O24 Design and reporting of randomised controlled trials on treatments
for cutaneous leishmaniasis
U Gonzalez

11.34 O25 Comparison of patients and providers severity evaluation of oral
mucosal diseases
F Sampogna

11.46 O26 Comparison of sun protection behaviours among metropolitan and
non-metropolitan health regions
S Kalia

- 12.00 **Presentation of best abstracts by Councillor Brian Grocock,
the Sherriff of Nottingham**
- 12.15 **Burden of Skin Disease Consensus:
What happens from here?**
Suephy Chen
- 12.25 **Closing Remarks**
Hywel Williams
- 12.30 **End of Meeting and Lunch**

* * * * *
